PROFESSIONAL SUMMARY

QA Automation Engineer with 6+ years of manual and automated testing experience at Redis Cloud and in the IDF. Specialized in Playwright and TypeScript automation, REST API and microservices testing, CI/CD quality gates, framework architecture, flaky-test stabilization, and observability-driven debugging.

SELECTED ACHIEVEMENTS

- **Billing-platform migration:** designed the E2E automation strategy, closed coverage gaps, and created a three-phase mitigation plan; supported a successful launch with no known revenue-impacting regressions at release.
- **CI stability:** built a GitHub Actions workflow that automatically reruns failed critical-path tests, reducing manual intervention and false-negative CI noise.
- **Microservice quality gates:** drove CI/CD quality gates and critical E2E coverage for a new billing microservice, creating a reusable reference model for additional services.
- **Ownership:** owned automation decisions and quality strategy for critical revenue-related product flows in the Billing scrum.

EXPERIENCE

QA Automation Engineer · Redis Cloud Aug 2022 – Present

- Own automation and quality coverage for Redis Cloud billing, subscriptions, databases, and service-management journeys.
- Build and maintain Playwright and TypeScript frameworks for E2E and REST API coverage with production-like flows, CI evidence, traces, and focused reruns.
- Partner with developers and product managers on high-priority billing and subscription releases.
- Stabilize flaky tests and investigate failures across logs, traces, deploy context, and CI artifacts to separate product regressions from infrastructure noise.

QA Automation Engineer · IDF – Shachar Unit, Lotem Nov 2019 – Jul 2022

- Contributed to the unit's first end-to-end automation infrastructure using Python and Selenium.
- Supported migration from legacy testing libraries, trained developers, reviewed code, and performed automated and manual testing across multiple deployment environments.
- Worked with product managers on Agile test specifications, bug management, and test planning for new products and features.

CORE SKILLS

Automation	Playwright, TypeScript, Selenium, Python, test framework architecture, E2E testing, manual testing
API & Cloud	REST API testing, Postman, microservices testing, billing systems, SQL, Kafka, Kubernetes
CI & Debugging	GitHub Actions, Jenkins, GitLab, CI/CD quality gates, ReportPortal, observability, root-cause analysis, flaky-test stabilization
Engineering Languages	Java, Git, code review, Nx, pnpm, Jira, Agile, AI-assisted QA Hebrew, English

EDUCATION & COURSES

Basmach QA Certificate · Basmach, Mamram, Ramat Gan May 2020 – Jul 2020

Advanced Automation · INT College Oct 2020
